ABOUT ME

Backend Developer with 2+ years of web development experience and a strong focus on Python, REST APIs, SQL/MySQL, HTTP fundamentals, JSON, and API testing. Hands-on experience designing relational databases, working with CRUD operations and API request/response flows, and using Git/GitHub for development workflows. Also experienced in freelance WordPress and web development, bringing practical client-facing experience and a strong foundation.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

- Developed and customized responsive websites according to client requirements and project goals.
- Built and maintained WordPress websites using themes, plugins, Elementor, PHP, HTML, CSS, and JavaScript.
- Customized layouts and website functionality while troubleshooting responsiveness, usability, and technical issues.
- Handled client requirements, revisions, communication, and delivery of web development projects.
- Applied practical Git/GitHub workflows and maintained development
